

Hi there, I am Farah from Jakarta in Indonesia.

I am studying in Germany and I have successfully passed my Studienkolleg this year. I have obtained five Admission Letters from five different German Universities for winter semester 2016/17:

University of Applied Science Kaiserslautern,

University of Applied Hof and

University Wuppertal,

Bauhaus University Weimar,

Brandenburg University of Technology (University of Cottbus).

All of them are governmental Universities and are excellent in teaching and research. Now, that I have to choose one of them for my further studies is not an easy choice.

With the help of BSK International I not only got into Studienkolleg and obtained the before mentioned Admission Letters, but also all issues related to my visa and staying permission were solved successfully in the end.

I experienced many troubles with my staying permission and visa. But thanks to the steady and repeated help of the legal department of BSK International, all problems were professionally solved.

My personal experiences have been amazing in that sense that I have never seen such a warm welcome. The teachers are really nice, friendly and integrated me fast and successful in my new home. They always support and help me with my study and my needs as a student there.

The people here in Germany are also very helpful and understanding.

Germany is a safe and clean place to study.

I live in Germany for almost 2 years and I feel happy about the culture, the people and the atmosphere here. Thanks to the help from BSK International, I can enjoy my study and my life in Germany.

Regards,

Farah, Magdeburg /Germany August 11th 2016
