

Hello, I am Ribhu Srivastava. I am from India.

I came to Germany with the help of Bsk International for Masters program. They helped me with the documents for visa. They had also provided a Masters conditional letter from TU Clausthal, which is a government funded technical university. They arranged my living in Bonn, which is a beautiful place to study. I started my language course with Ifs, Bonn. I couldn't have asked for a better language school. The language course in Ifs is designed such to achieve a student goal for Testdaf within a year. Bsk also helped me with the documents required for visa extension.

Initially, I faced some problems regarding my language classes because of ambiguous information but they sorted it out. And I believe, just have patience and keep informing them about your problems and they will sort everything. And give time for your German language.

People in Bonn are very friendly and helpful. It is a safe place for students. You get a lot of international exposure while studying your language course and get to know lot about Germany.

Regards,

Ribhu Srivastava.
